

# Trust the Original.

THE SCHWARZMÜLLER GROUP  
INTERNATIONAL WORKSHOP NETWORK

# Schwarz Müller for Schwarz Müller.

Protect your investment in a Schwarz Müller vehicle with original Schwarz Müller service in Schwarz Müller's own workshops for guaranteed peace of mind.

**A**s a premium supplier of commercial vehicles, Schwarz Müller takes responsibility for the quality of its vehicles up to and beyond their life cycles, while guaranteeing a comprehensive support concept.

A network of workshops and company-owned service sites are available for all your regular servicing needs. Our total of 250 trained specialist staff have only one thing in mind: that your Schwarz Müller remains a Schwarz Müller.

### **Company-owned workshops: genuine centres of excellence!**

It is not just in the field of commercial vehicles that Schwarz Müller sets benchmarks; we prioritise the utmost quality when it comes to vehicle servicing too. 16 company-owned workshops in seven countries throughout Central and Eastern Europe come together to form a comprehensive maintenance service. Schwarz Müller also has more than 350 service partners at its disposal throughout Europe.

### **Specialist staff: true professionals!**

Our workshop staff are true vehicle professionals. Our teams consist of highly-qualified specialists who undergo ongoing training. Schwarz Müller customers receive the support of specialists from several different professional sectors, including commercial vehicle mechanics, vehicle electronic technicians, mechatronics technicians and production technicians.

### **Original spare parts: quick availability!**

The rapid availability of original spare parts increases the operational reliability of your Schwarz Müller vehicles. We deliver within 24 hours, with the added special option of next-day delivery by 10 am.

As an authorised dealer and partner of major system and component suppliers, we take charge of the entire spare part management process – including organisation, procurement and installation.

### **Intelligent value preservation: the full package!**

Schwarz Müller offers much more than the standard workshop services when it comes to vehicle servicing. TOP. The TOP. maintenance service from Schwarz Müller provides you with support in the form of a variety of breakdown and servicing packages, ensuring your Schwarz Müller fleet is always in perfect condition! TOP. can help you reduce your maintenance costs and increase the resale value of your vehicles. That is our definition of premium manufacturer service.

# Everything Your Schwarz Müller Needs.

13 company-owned Schwarz Müller workshops offer a comprehensive maintenance and repair service portfolio.

## **Axles**

Our specialists inspect, repair and adjust all leading manufacturer axles, whether DCA, BPW, SAF or Gigant. A vehicle diagnostics and a track gauge device is used to check the wheel alignment and steered axle systems.

## **Brake technology**

Brake performance is inspected on our own brake test stands and lanes. All leading manufacturer systems, such as EBS and ABS, are inspected, diagnosed and repaired by our specialists.

## **Total overhaul and modernisation**

From old to new: quality vehicles with complex technology and purchase costs to match deserve product life cycle-extending servicing. Together we can develop overhaul and modernisation concepts to suit your budget.

## **Statutory checks**

Our specialists prepare and perform all prescribed inspections, such as the §57a (Pickerl) or the TÜV, as well as any type classifications or periodic inspections required.

## **Tail lift and crane servicing**

A number of Schwarz Müller vehicles are equipped with tail lifts and cranes. It goes without saying that we can perform any necessary alignment, servicing or repair work for these components too.

## **Paintwork**

We take care of all kinds of painting - from minor touch-ups and individual spare parts components right through to complete bodywork repainting. We even have our own blasting equipment on hand for optimum priming.

## **Pneumatics/hydraulics/electrics**

Thanks to our manufacturer expertise, we have direct access to all the necessary technical info, manufacturing processes and components. We take care of diagnostics, repair and replacement in any system.

## **Tyre service**

Whether simple tyre replacement or tyre sealing – our comprehensive tyre service ensures safety and smooth running. Furthermore, as a dealer, we can provide you with all standard tyre makes.

## **Damage and insurance claim handling**

When it comes to accident damage, our assistance covers more than just repair, we proceed straight to claims handling with the respective insurance companies too (with precise cost estimates of course).

## **Welding**

Precision work which, at Schwarz Müller, is performed only by certified and authorised welding engineers. They specialise in steel, stainless steel and aluminium in a variety of material thicknesses and layers.

## **Servicing of other manufacturer makes**

We also offer our extensive expertise for the service and repair of trailers and semi-trailers from other manufacturers. We can supply you with original parts from all major manufacturers quickly and cost-effectively.

## **Accident damage**

Our service branches offer repairs even for seriously damaged vehicles. Our technical insight as a manufacturer and many years of experience in frame alignment work guarantee perfect damage repair.

# Workshop Servicing for Every Model.

Each vehicle has its own requirements in terms of servicing, repair and maintenance. Schwarzmüller offers comprehensive all-in service in all eight product groups.

## Timber/stanchion trucks

Each area of application has its own specific material requirements (e.g. wear by gripper). This is an area where our many years of experience can offer you great benefit. In addition to all standard works, we offer the relevant checks, servicing and repairs.

## Sliding-floor trucks

Schwarzmüller service stations offer precision alignment services for sliding-floor hydraulic systems. Our professionals perform repairs, such as bottom board rotating and swapping, or work on the hydraulic and pneumatic systems.

## Tipper trucks

We take care of metalworking for tipper vehicles as well as the replacement or subsequent installation of base plates. The tipper bearing is inspected repaired or replaced. Cylinder sealing and/or replacement is dealt with by our professionals.

## Tanker trucks

Trained specialists take care of the repair and servicing of all built-in systems and carry out periodic calibration, pressure testing as well as leak and ADR inspections. We are happy to assist with non-standard checks too.

## Refrigerated/box trucks

In addition to standard vehicle work, we take on special repairs for trailer interiors and exteriors, e.g. refrigeration systems – including any polyester work necessary.

## Flat-bed trucks

Alongside all customary checks and any adaptations required, we provide specialist inspection, alignment and repair for the chassis and the hydraulics system. Our manufacturer expertise guarantee safety even with high payloads.

## Platform trucks

From the chassis itself and the trailer, right through to the sheeting and roof system, every last detail undergoes close inspection by our specialists as well as, where necessary, replacement or repair.

## Swap-body trucks

Likewise, the mechanisms of swap-body trucks, such as pneumatic rapid change devices, must be subjected to regular inspection and maintenance. This work is of course carried out in addition to all the standard inspections.

# Always Close at Hand for your Vehicle Fleet.

There is no better way to keep your Schwarzmüller vehicle in top condition than our servicing workshops. Trust the Original.

**N**obody knows Schwarzmüller vehicles better than our qualified workshop experts. 13 branches in seven different

countries offer a comprehensive range of services in the fields of servicing and repair, ensuring your Schwarzmüller remains an original Schwarzmüller.
