Timber/Stanchion Trailers
Schwarzmüller Group is a family-owned enterprise based in Austria yet active internationally. Considered one of today’s leading European commercial vehicle suppliers, the Group centres its currently 21 sites in Central and Eastern Europe.

Schwarzmüller provides not only a broad range of vehicles but also optimised solutions for almost any industry. More than once, the premium manufacturer and innovation leader has set the pace regarding payload and handling and is thus decidedly adding value to everyday applications.

Another factor that has been speaking in Schwarzmüller’s favour for decades is the Group’s extensive service offering covering the entire product lifecycle: Significantly extends for vehicle’s useful life. Services include everything from maintenance and OEM spare parts availability to rentals and leasing.

Schwarzmüller Group produces at four sites: Special-purpose vehicles are made at its Upper Austrian headquarters. Standard and near-standard vehicles are made in the Czech Republic and Hungary, whereas skip container vehicles are made in Neustadt/Dosse. Our annual production output amounts to about 11,000 vehicles. Over 350 service centres located along the major European transport routes ensure that your vehicles will remain available for everyday use.

Since 1871, Schwarzmüller has been working to win and retain industrial innovation and technology leadership based on the competency and know-how of its employees. Lightweight design and its benchmarks set by Schwarzmüller for over 25 years is but one example.

Other areas include construction, metal structures or welding where Schwarzmüller periodically kicks off new developments or often is the first supplier using new vehicle manufacturing technologies. This is how turn innovation into mass production. Thus, if you are looking for smart vehicle solutions, special requirements or top quality, try Schwarzmüller to find an ideal partner.
Smart visionary vehicles.

A Schwarzmüller vehicle must successfully face various challenges. This is why construction makes the first difference.

Compared to towing vehicles, the role of commercial trailers will further gain in importance because, owing to current traffic densities as well as infrastructural and legal constraints, the number of towing vehicles will grow but slowly. The performance of both trailers and bodies therefore needs to increase. Schwarzmüller is driving this development with smart designs: Bodies and trailers provide many improvement options from payloads, longer useful lives and simplified handling to cost reductions.

A competent and innovative team of over 2,150 development, design and manufacturing personnel share Schwarzmüller’s vision and turn it into smart vehicle. Latest innovations such as the POWER LINE semitrailer, the first walking floor weighing less than seven tons or the thermo-tipper trailer for transporting temperature-controlled asphalt are impressive examples of this spirit of innovation.

And quality is not an accidental feature of Schwarzmüller either: 3D design down to the smallest detail and highly efficient quality assurance methods ensure that the vehicles are powerful performers in everyday practice.

A typical characteristic of Schwarzmüller is the specialised handling of steel and aluminium in production. It is one of fundamentals of the premium quality that Schwarzmüller vehicles are distinguished by.

The vehicles of the two Schwarzmüller and Hüffermann brands roll out to the construction sector, infrastructure companies, raw materials and reusables industries and short-distance & long haul forwarders. The enterprise is the only full-range supplier at premium level to make eight groups including a total of 150 different types of vehicles. Our more than 1,000 model variants satisfy almost any specific wish a customer may have. All of these vehicles share top-level quality, sturdiness, toughness and an optimised payload.
Intelligent Solutions for All Requirements.

Timber/stanchion trailers from Schwarzmüller combine lightweight construction with extreme robustness. They are tailored perfectly to the demands of the timber industry and show their quality on any terrain.

Requirements for use in forests vary greatly from region to region. The narrow mountain roads of the Alpine region pose challenges for transportation vehicles which are quite different from those of the heavily wooded areas of Eastern Europe. With its various vehicle models, Schwarzmüller offers the required flexibility to be optimally prepared for any scenario.

The drawbar trailers with twin tyres for optimum stability are ideal for steep and narrow forest roads or poorly developed roads. A version platform loading surface is available for the secure transportation of timber.

Austria’s premium manufacturer proves its innovative edge with its latest, highly-robust semi-trailer. Thanks to the typical Schwarzmüller lightweight construction and a net weight from 4.9 tonnes, this model enables a significantly greater payload. The risk of overloading when off-road is reduced considerably too.

A short central-axle stanchion trailer, particularly impressive when it comes to manoeuvring, rounds up the product portfolio.
All timber/stanchion trailers from Schwarzmüller are characterised by their ultra low weight but extreme robustness and superior stability. The innovative lightweight Schwarzmüller design and the use of robust Naxtra steel produce torsionally flexible vehicles of outstanding quality. Only high quality raw materials and components such as ExTe stanchion posts and axles from renowned manufacturers are installed.

Standard Equipment.

Schwarzmüller timber/stanchion trailers set benchmarks in terms of payload, handling and service life - even in the standard version. Even in the standard configuration, these offer countless solutions which guarantee a superior performance from these vehicles on a daily basis. The symbols indicate which configuration detail corresponds to which feature.

-Added value

1. Mounted fitted timber-stad

These are attached to the vehicle by clamp fastening and therefore horizontally-adjustable as required. They serve to ensure secure transportation of the cargo (logs).

2. Clamshell protection plates

Clamshell protection plates on the side members prevent the clamshell from causing damage during unloading.

3. Aluminium underride guard

This ensures that the trailer or semi-trailer cannot be underridden, improving safety for other road users. Also available in steel or stainless steel.

4. Plywood trailer flooring

This cover between the side members protects the components underneath, such as valves. Optionally as a grooved plate cover in aluminium or steel.
Optional Equipment.

Schwarzmüller timber/timberlin trailers are constructed in line with individual customer specification. Optional configuration details improve the performance of the vehicle considerably. The symbols indicate which configuration detail corresponds to which feature.
Best-in-class customer service.

Single source for solutions matching any Schwarzmüller vehicle requirement.

Schwarzmüller benefits its customers not only with an extensive product portfolio but also with a complete system services offering. Customers can rely on pinpoint solutions throughout their vehicles’ entire lifecycle - in currently 21 countries.

Our own network of garages plus 350 further service partners ensure that your Schwarzmüller will always be and remain a Schwarzmüller. Our experts know exactly how to best maintain and service a Schwarzmüller vehicle. An international logistics network allows permanently available OEM spares to be supplied rapidly.

Schwarzmüller runs one of Europe’s largest fleet of hired standard and special-purpose vehicles. It helps you buffer peak demands without having to do without premium quality. Also ask for Schwarzmüller’s tailored leasing opportunities. Schwarzmüller’s own Financial Service or an external partner’s service with or without a service agreement: It is always up to the customer to opt for the perfect answer to their needs.
Close to our customers in 21 countries.

Schwarzmüller Group and our sales partners currently run own sites (production, sales and service) in 21 Central and Eastern European countries. This international network and its about 2,150 employees are the basis of successful relations with customers of many industries requiring challenging transport solutions. It allows Schwarzmüller to penetrate the entire market region with new vehicles and a portfolio of services throughout the entire lifecycle of its products.
Intelligent full-range portfolio.

Schwarzmüller vehicles satisfy almost any transport need. From aluminium tank semi-trailer to centre-axle tipper trailers.

Schwarzmüller is proud of being able to supply its customers with smart vehicle for practically every application. Our eight product groups cover over 150 types of vehicles with more than one thousand model variants. All types of vehicles benefit from the know-how, core competence and innovative power of the entire Group. They provide the perfect answer to the transport needs of the industries served. All Schwarzmüller vehicles stand for uncompromising premium quality to create real added value in everyday use.
